

SPECIAL ANIMAL BREEDING

Bachelor study program

Profile of Graduate

A graduate of the study program manages the issue of biological features and properties of various kinds of livestock, domestic and exotic animals, genetic and physiological aspects of their breeding, health, hygiene, nutrition, feeding and breeding, as well as the issue regarding prevention against diseases.

He is able to creatively apply his theoretical knowledge into practical animal breeding in line with the home country legislation and international conventions. He uses his gained knowledge at solving problems in special animal production as well as in self-management of agricultural farms.

Enforcement of Graduate

Graduates are ready to work as managers and specialists in areas dealing with breeding livestock, domestic and exotic animal species in zoos, in breeding associations and unions. They can also work in the field of marketing, expert counseling and trading with various breeding goods.

Study program supervisor

doc. Ing. Jozef Gašparík, CSc.
